

International Relations | Policy Studies

“*Theorizing European Space Policy* successfully fills a long-standing gap in understanding the politics of space activities in Europe.”

—Kai-Uwe Schrogl, European Space Agency

In the modern world, technical issues define space policy. Missing from discussions of space policy, however, is a consideration of the political consequences of new space endeavors, particularly in the context of the European Union. *Theorizing European Space Policy*, therefore, approaches space policy instead from the discipline of European studies and analyzes the European integration process through the lenses of political science, history, economics, and international relations. The strengths of each discipline are used to apply theoretical approaches to current issues in European space policy. This book is the latest contribution to the growing debate on space policy and its role in the European integration process.

Contributors

Maarten Adriaensen, Christina Giannopapa, Thomas Hoerber, Martin Kenneder, Fabian Kienzler, Harald Köpping Athanasopoulos, Arne Lahcen, Christopher Lehnert, Marius Leissle, Sarah Lieberman, Iraklis Oikonomou, Lorna Ryan, Emmanuel Sigalas, Paul Stephenson, Ersilia Vaudo, Johann Dietrich Woerner
